## PROFESSIONAL SUMMARY

Results-oriented Data Analyst with hands-on experience in SQL, Python, Power BI, and IBM Cognos Analytics. Delivered end-to-end analytics projects including interactive dashboards analyzing 500+ records across multiple datasets. Completed a data analytics internship via the IBM Naan Mudhalvan program at Adroit Technologies, building BI solutions and reporting frameworks. Seeking a Data Analyst role to drive data-driven decision-making and generate actionable business insights.

## EDUCATION

|                                                                                                                          |             |

| <ul style="list-style-type: none"><li>Analyzed sales data for 25+ restaurants to find an 8.7% growth trend and improved the menu by finding the best-selling foods.</li><li>Built clear data reports to find and fix delivery problems and slow service times across all outlet locations.</li></ul>                                                                                                                                                                                                          |

**Retail Sales Analytics Dashboard | Microsoft Excel**

- Designed interactive Excel dashboards analyzing 200+ sales records across 5 regions to surface top-performing products and revenue trends.
- Implemented pivot tables, VLOOKUP, and conditional formatting; reduced ad-hoc reporting time by ~40%.
- Presented findings in a structured report demonstrating the business impact of data-driven inventory decisions.

**DigiDrive – Digital Asset Management System | React.js / Node.js / MongoDB**

- Built a full-stack web platform for uploading, storing, and organizing digital files using React.js, Node.js/Express.js, and MongoDB Atlas for cloud storage.
- Deployed to production via Vercel and Render; implemented secure file handling and responsive UI for seamless user experience.

**ACHIEVEMENTS**

---

- Finalist – IBM Node.js & REST API Hackathon, conducted under the Naan Mudhalvan program.

**TECHNICAL SKILLS**

---

**Data Analytics:** SQL, Python (pandas, numpy, matplotlib, seaborn), Power BI, IBM Cognos Analytics, Microsoft Excel

**Data Skills:** Data cleaning, ETL, data wrangling, statistical analysis, data visualization, dashboard design

**Web & Tools:** HTML, CSS, JavaScript, React.js, Node.js, MongoDB, Git & GitHub

**Soft Skills:** Analytical thinking, data storytelling, cross-functional collaboration, attention to detail

**LANGUAGES**

---

**English** — Working Proficiency    **Tamil** — Native Proficiency
